

Armenian solar container manufacturing

Overview

Major projects now deploy clusters of 20+ containers creating storage farms with 100+MWh capacity at costs below \$280/kWh. With its abundant sunshine, Armenia is quickly becoming a prime destination for solar energy development. Its average annual solar energy flow is significantly higher than the European average (1,720 kWh/m² versus 1,000 kWh/m²). Solar AM promotes the production of Green energy through environmentally safe processes using sustainable technologies. We have extensive manufacturing experience covering services such as battery enclosures, grid energy storage systems, server cabinets and other sheet metal enclosure OEM.
