

Bahamas solar container policy

ESS

Overview

The policy includes installing renewable energy – including solar and biomass co-generation — and battery storage systems, replacing aging generation units, and eliminating BPL rentals. This will introduce net-metering, which is the re ordering of energy flows in both directions. The Bahamas, with an average of 350 sunny days per year, offers a prime opportunity for solar energy. Do I need a Tax Compliance Certificate (TCC) or a Business License for the duty concession?

No. The Caribbean Centre for Renewable Energy and Energy Efficiency (CCREEE) signed an agreement with the Government of The Bahamas on August 22, 2023, to develop an integrated resource and resilience plan (IRRP) that will help improve the country's national energy policy and capitalise on renewable.
