

# **Bamako outdoor safe charging smart solar container**

## Overview

---

The container is equipped with foldable high-efficiency solar panels, holding 168–336 panels that deliver 50–168 kWp of power. It is the perfect alternative to unstable grid power and diesel generators, keeping operations running even in remote areas or where infrastructure is. Pre-fabricated containerized solutions now account for approximately 35% of all new utility-scale storage deployments worldwide. These advancements address current challenges and contribute to a more sustainable and convenient future. Power Container with 120kwh lithium storage. It uses lithium iron phosphate battery, with 3000+ cell cycles, and the electronic components can be used for about 5000 hours. Major projects now deploy clusters of 20+ containers creating storage farms with 100+MWh capacity at costs below \$280/kWh.
