Overview

Are solar container projects in Egypt worth your investment?

With 2,800+ annual sunshine hours and government incentives pushing renewable energy adoption, Egypt has emerged as a hotspot for off-grid and commercial solar solutions. Make the next step towards renewable energy with our Solarcontainer! The challenges of our time are more present than ever. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar. A Middle Eastern infrastructure client deployed six customized MEOX solar containers for construction across a 50km highway project. The design is compact, allowing overall transportation, easy installation and debugging, and low construction cost; The liquid cooling system ensures higher system efficiency and cell cycling up to 10,000 cycles.
