

# Cairo recycling solar container batteries

## Overview

---

With Cairo aiming to boost renewable energy to 42% by 2035, recycling isn't just eco-friendly—it's essential. Here's the step-by-step magic: Collection: Batteries are gathered from solar farms, telecom towers. Did you know that lithium-ion batteries lose 20% of their capacity after 1,000 cycles?

That's like your phone dying mid-call—but imagine it happening to solar farms or EV grids. We turn hazardous waste into valuable resources — driving sustainability and supporting a cleaner, greener future for the region. Their comprehensive services include the management and processing of E-waste, which directly contributes to reducing harmful. Revolutionize the recycling of lithium-ion batteries, tackling the growing challenge of electronic waste in an environmentally responsible manner. to serve our environment by creating value of garbage via PET1 recycling Meet Ahmed and Moataz that work here Plastale Meet Abdallah and Abdelrahman that work here We use solar power to be our ultimate heat energy source in plastic recycling process and build low cost mini-factories using.
