

Cimc solar container technology research institute

Overview

The project is one of the Shenzhen Municipal Technology Breakthrough Projects with a funding of 10 million RMB and is the one up-to-date to meet the developing CCUS (carbon capture, utilization and storage) technology, with the main research focus on the process of membrane carbon. Recently, the "GTIIT-CIMC OFFSHORE Joint Laboratory of Decarbonization & New Energies", co-built by Guangdong Technion - Israel Institute of Technology (GTIIT) and China International Marine Containers (CIMC) Offshore, was officially inaugurated and settled in Shantou Science City as a. In decades, CIMC engineers have taken the lead in researching and applying waterborne paint instead of solventborne paint in the container industry, researching new bamboo-wood floor instead of tropical hardwood floor, creating digital/intelligent factories, pushing the industry towards automation. The market is witnessing rapid adoption due to increasing demand for decentralized and portable renewable energy solutions. CIMC-EST, as the largest integrated ES equipment manufacturer in China, could provide customized ESS solutions under various scenarios and offer commercialization options for cutting-edge energy. Let's face it - the world's energy game is changing faster than a Tesla charging on super mode. As renewable energy adoption skyrockets, CIMC Energy Storage Technology Company has emerged as a key player in solving the puzzle of intermittent power supply.
