

Compressed air solar container book

Overview

The intermittency of renewable energy sources is making increased deployment of storage technology necessary. This technology strategy assessment on compressed air energy storage (CAES), released as part of the Long-Duration Storage Shot, contains the findings from the Storage Innovations (SI) 2030 strategic initiative. Flexible & location-independent compressed air supply We plan, build and install a ready-to-use compressed air. We support projects from conceptual design through commercial operation and beyond.
