

# Design of self-made lithium battery solar container system

## Overview

---

This article explains, in simple language, what a solid container home plan should include. We'll also reserve a section to show how to design a LiTime batteries-based energy storage system at the planning stage, so construction. The lithium-ion battery has the characteristics of low internal resistance, as well as little voltage decrease or temperature increase in a high-current charge/discharge state. The battery is expected to be used not only in a transportation uses such as electric vehicles (EV), but also for. You may already be familiar with brands like Bluetti, Jackery, or EcoFlow and their bestselling product — the solar generator.
