## Overview

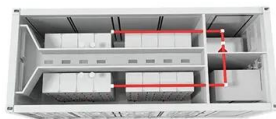

---

A standard 40HC container that cost \$3,500 pre-2023 now averages \$4,200 - and that's before adding solar components. Pro tip: Some suppliers now offer "container-lite" designs using recycled materials to sidestep. As demand is rising around the world for off-grid power in far-flung, mobile, and emergency applications, people want to know how much does a solar container system cost?

Whether it's NGOs giving refugee camps electricity or construction firms seeking reliable power in undeveloped regions. We are pleased to announce the release of the latest edition of Berkeley Lab's Tracking the Sun annual report, describing trends for distributed solar photovoltaic (PV) systems in the United States, including the growing contingent of distributed solar-plus-storage systems. If you're looking for JA Solar, Mission, Astronergy, Trina, Qcells, SEG, Adani - give us a ring.
