

Domestic household sodium ion solar container

Overview

In 2022, Bluetti announced a sodium ion solar battery for home use that is not yet available for sale, but is worth keeping an eye out for. Considering sodium ion batteries are not yet widespread, existing lithium ion solar batteries on the market are still great options for energy. From home photovoltaic energy storage system to grid peak and valley adjustment, to emergency power, sodium ion battery are expected to become one of the mainstream technologies in the future energy storage market. This advancement offers a sustainable, safe, and cost-effective alternative to traditional Lithium-ion batteries. One significant advantage of sodium-ion cells is it's better performance at low temperature compared to LFP.
