

Domestic solar container battery cost price trend

Overview

A new analysis from energy think tank Ember shows that utility-scale battery storage costs have fallen to \$65 per megawatt-hour (MWh) as of October 2025 in markets outside China and the US. At that level, pairing solar with batteries to deliver power when it's needed is now. At present, the common solar energy storage batteries in the market mainly include lead-acid batteries, lithium-ion batteries and some emerging technology batteries (such as sodium-ion and solid-state batteries, etc. Anza, a subscription-based data and analytics software platform, released a Q1 2025 report that reveals trends in domestic manufacturing of solar modules and battery energy storage systems (BESS).
