

# Electric car solar container clean solar container 240 volt

## Overview

---

Charging your EV with solar panels is the cheapest, cleanest, and most convenient way to power a car. That clean power can then be used to run your household appliances or feed directly into your EV charger. Like all devices and appliances that rely on rechargeable batteries, electric vehicles (EVs) and hybrids require frequent charging from a 120V or 240V source of electricity, But, as you can imagine, the charging input requirements are significantly higher for EVs. Sustainability is a holistic term, its much more then solar or framing, you need to provide every thing for human survival in a replenish-able self sustaining way. This portable solar-powered charger harnesses the power of the sun to help charge your electric vehicle up to 30 miles a day.
