## Overview

---

Join us as we take a detailed walk-through of the planning and installation of our 3kW - 5kWH - 120V off-grid solar system that powers a rehabbed shipping container! Hi there, we're Jonathan & Ashley from Tiny Shiny Home. Norm's system uses a large homemade solar heat storage and drain back tank to provide solar space heating and domestic water heating for his home in Maine. [com/combi-boiler-with-solar-panels/#:~:text=Combi%20boilers%20are%20an%20excellent,and%20ground%20source%20heat%20pumps.](#) Has anyone installed a solar electric combi boiler here in the USA?

Batteries are a lousy way of storing large quantities of energy. The collector will harness the sun's energy to heat the water, which then moves through the copper tubing and is stored in the insulated tank.
