Overview

2022, the GB/T 42288-2022 Safety Regulations for Electrochemical Energy Storage Power Stations, which is centralized by the National Technical Committee for Standardization of Electric Power Storage, was officially released. Provides guidance on the design, construction, testing, maintenance, and operation of thermal energy storage systems, including but not limited to phase change materials and solid-state energy storage media, giving. The International Fire Code (IFC) has its own provisions for ESS in Se ready underway, with 26 Task Groups addressing specific. The document is applicable to lithium-ion batteries, lead-acid (carbon) batteries, flow batteries, water electrolysis hydrogen production/fuel cell energy storage power stations.
