

# Global electrochemical solar container project share

## Overview

---

Pre-fabricated containerized solutions now account for approximately 35% of all new utility-scale storage deployments worldwide. North America leads with 40% market share, driven by streamlined permitting processes and tax incentives that reduce total project costs by 15-25%. The market share of electrochemical energy storage projects has increased in recent years, reaching a capacity of \*\*\* gigawatts in 2022. Global installed capacity reached 45 GW in 2023, with projections hitting 250 GW by 2030. Growing demand for efficient and competitive energy resources is likely to propel market growth over the coming years.
