

Global new solar container installed capacity in 2025

Overview

In the first six months of 2025, the world added 380 GW of new solar capacity — 64% higher than during the same period in 2024, when 232 GW were installed. China dominated the market, contributing 67% of the total installations with 256 GW DC, while India and the US. Growth is driven by the rising adoption of off-grid and hybrid power solutions, especially in remote, disaster-prone, and developing.

Global new solar container installed capacity in 2025

Hambantota Port Container Volumes Surge 705% in 2025, Capacity

Sri Lanka's China-backed Hambantota Port recorded a dramatic surge in container handling volumes in 2025, with throughput rising 705 percent to 428,036 twenty-foot equivalent units

...

Africa: Global manufacturers target 'underestimated' solar market

This has been the case for the past five years." Have you read? Changing face of South Africa solar market The report says that as a result, the global total installed capacity has almost ...

Global solar installations rose by two thirds in H1 2025

Global solar installations surged by two thirds (64%) in the first half of 2025, new data from Ember has revealed, with 380 GW of new solar capacity added during the period.

World Energy Outlook Report 2025

China: 45-60% of global RE deployment
Dominant manufacturer of solar panels & batteries
Global surplus: Solar manufacturing capacity > 2x deployment
Battery capacity ~3x

...

DNV: MENA solar and wind capacity set for ten-fold growth by 2040

A new analysis by DNV finds that the Middle East is entering a period of rapid renewable power growth, led by very large solar projects and the increasing use of energy storage.

2026 Energy Storage Outlook Policy and Scale Reshape C& I and Container

Policy as the Primary Catalyst: Governments are no longer just observers but active architects of the storage market. China's *New Energy Storage Scale Construction Action Plan (2025 ...

Global Solar Growth to Slow in 2026 as China, U.S. Scale Back

The decline will be the first time global solar growth has slowed since the industry emerged two decades ago. The analysis anticipates that a total of 649 gigawatts (GW) of solar power ...

China Nears Record Annual Solar PV Additions In 2025

With nearly 275 GW of new solar PV capacity added between January and November 2025, China is on course to surpass its total installations from the previous year, which exceeded ...

Global Solar Outlook 2025-2029: SolarPower Europe Forecasts 1 TW

...

The global solar industry experienced unprecedented growth in 2024, with a record 597 gigawatts (GW) of new solar capacity installed, marking a 33% increase over the previous year.

Renewable Energy In 2025: Progress, Setbacks, And The Road Ahead

And it's not just about capacity; Emerging economies are stepping up, too. For example, India installed over 20 gigawatts of solar and wind capacity in the first half of 2025, matching the ...

Thirteen African Countries Now Generate More Than 10% of Power

...

Thirteen African countries now generate more than 10% of their electricity from solar energy, led by the Central African Republic. Africa added 2.4 gigawatts of solar capacity in 2025, bringing ...

Renewable Capacity Highlights 2025

At the end of 2024, global renewable power capacity amounted to 4 448 GW. Solar, in line with the previous year, accounted for the largest share of the global total, with a capacity of 1 865 GW.

Installed solar energy capacity

Data source: IRENA (2025) - Learn more about this data. Total solar (on- and off-grid) electricity installed capacity, measured in gigawatts. This includes solar photovoltaic and ...

Global solar installations surge 64% in first half of 2025

Global solar installations are on track for another record year. In the first six months of 2025, the world added 380 GW of new solar capacity -- 64% higher than during the same period in ...

India Installed Close To 38 GW Solar PV Capacity In 2025 - ...

The Ministry of New and Renewable Energy (MNRE) recently said that India added 81 GW of solar module production capacity in CY2025, reaching a combined 144 GW, while cell capacity ...

Future-Proof Your Home: 2025-2026 Solar Energy Storage System ...

2025-2026 Ultimate Guide to Choosing Premium Solar Energy Storage for Your Home ??????
2025-10-17 With rising electricity costs and global shifts toward renewable energy, solar ...

Global Solar Installations Up 64 Percent So Far This Year

In the first six months of 2025, countries installed 380 gigawatts of solar capacity, up from 232 gigawatts in 2024, according to a new analysis from Ember, an energy think tank.

Global solar growth outpaces policy shifts, but insurance pressure

The US Energy Information Administration (EIA) projected 32.5 GW of new utility-scale solar capacity in 2025, with Texas (11.6 GW) and California (2.9 GW) accounting for nearly half of ...

H1 2025: China installs more solar than rest of the world combined

Global solar installations are breaking records again in 2025. In H1 2025, the world added 380 gigawatts (GW) of new solar capacity - a staggering 64% jump compared to the same

Global Solar PV Installations Surge 64% in 2025

Global solar PV installations jumped 64% year-on-year (YoY) to 380 GW DC in the first half of 2025, driven by China's rush to install projects ahead of the new market-based pricing ...

Economic Breakthrough in C& I Energy Storage: 2025-2030 Market

...

By the first half of 2025, the country's new energy storage installed capacity reached 28GW, accounting for 42% of the global total, with grid-side independent energy storage ...

Solar power surges globally with 380GW installed in H1 2025

Global solar installations are set to achieve another "record" year, with 380GW of new solar capacity added worldwide in the first six months of 2025, according to a report by energy think ...

Deye inverters and Deye batteries are more compatible.

SOLAR CONTAINER MARKET 2025

In H1 2025, the world added 380 gigawatts (GW) of new solar capacity - a staggering 64% jump compared to the same period in 2024, when 232 GW came online. China was responsible for ...
