

# Greenhouse new solar container

## Overview

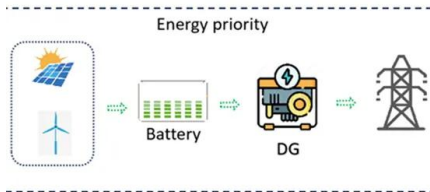

---

A solar-powered greenhouse uses sunlight as its main energy source—for heat, light, and sometimes electricity. Before you start building, it's important to understand two key approaches: passive solar design and active.

ArchSolar's unique design doesn't stop at fiberglass arches and extra wide bays — An ArchSolar GrowBox is like no other greenhouse in the industry. This new approach to agriculture is reshaping the way we think about traditional gardening, providing unique opportunities to. The Initial cost of a shipping container greenhouse typically ranges from \$10,000 to \$35,000. This is another off grid living original home design which combines the best of many aspects of off grid living.
