

How to make money with solar container on the power supply side

Overview

You can make money from solar power by selling excess electricity back to the grid through net metering, earning solar renewable energy certificates (SRECs), leasing your rooftop to solar companies, and investing in or developing solar farms. There are many ways to skin a cat, and even more ways to add solar power to a shipping container. It's important to note that these compensation policies won't generate significant. In short, you can indeed run power to a container - either by extending a line from the grid or by turning the container itself into a mini power station using solar panels. The roof and side of a 20 foot container is a very small solar surface and might only help reduce propane consumption, if there will be any HVAC loads.

How to make money with solar container on the power supply side
