

# Huijue technology solar container burned

## Overview

---

A fire broke out in a rooftop photovoltaic system at HalfMoon Industrial Park, Wilton, raising safety concerns for solar installations. The fire, contained by firefighters, highlighted risks such as aging components, overheating inverters, and poor isolation. As solar panels keep generating power when exposed to sunlight, shutting down power called for help from the factory technicians, thus delaying the emergency response. Luckily, the fire did not shoot inside; otherwise, the consequences could have been disastrous. Huijue Group's energy storage solutions (30 kWh to 30 MWh) cover cost management, backup power, and microgrids. Environmental Protection Agency (EPA) has been assigned by the Federal Emergency Management Agency (FEMA) to remove lithium-ion batteries affected by the Los Angeles County wildfires.
