## Overview

---

Major projects now deploy clusters of 20+ containers creating storage farms with 100+MWh capacity at costs below \$280/kWh. This paper analyzes the application status of distributed photovoltaic in industrial parks in depth, and focuses on the application scenarios and technical standards of related technologies. This is where a mobile solar containers can act as an additional power source to run the. Industrial parks, distributed widely and with high energy consumption, show the demand for and provide favorable conditions of application of photovoltaic (PV) systems in a large-scale.
