

Issues with southern solar container company s new equipment in 2024

Overview

This article presents an overview of the trend in Solar Container Technology, way forward, industry challenges, and drivers of the growing industry. However, 2024 has brought immense challenges, with higher interest rates, tighter financing, and adverse policy shifts in key states contributing to over 100 solar bankruptcies based on our industry data, a number unseen before in our almost 20 years in the solar sector. Some of the nation's biggest public solar companies are struggling to stay afloat as questions arise over the viability of the financial products they sold to both consumers and investors to fund their growing operations. In 2024, the US solar industry installed nearly 50 gigawatts direct current (GWdc) of capacity, a 21% increase from 2023. The global solar container market refers to the enterprise involved in the manufacturing, distribution, and utilization of sun electricity solutions encapsulated inside shipping containers.
