

Latest on the subsidy policy for solar container batteries in port of Spain

Overview

The government will subsidize up to 60% of the cost of installing a residential energy storage system, with a maximum subsidy of 50,000 kroner or \$5,600. The announcement follows the country's plans to stop burning fossil fuels to make electricity by the year 2040. Carbon Intensity Indicator (CII) regulation came into force in January 2023 as one of the main International Maritime Organization's measures to reduce Greenhouse Gas (GHG). Is solar energy a sustainable option for the shipping industry?

Method to assess the feasibility. €18M innovation fund for seawater battery R&D (yes, literally using saltwater!) Last month, Europe's first 50MW portside storage array went live using Tesla Megapacks. From pv magazine Spain The Spanish government has announced a funding scheme for hybrid energy storage projects s Spain's Bess pipeline lag compared to Italy's?

Spain's BESS pipeline lags equivalent markets.
