## Overview

---

This manual is an integral part of the intelligent all-in-one liquid cooling energy storage system. It describes the transportation, storage, installation, electrical connection, commissioning, maintenance and troubleshooting of the product. With the best usage experience, the products and product manuals are always in the process of improvement and upgrade. If the manual received is revised and amended continuously, so it is possible that there may be some errors or slight inconsistency with the actual product. CENTRIC-L 20 uses a typical 20-foot container design to provide a maximum rated capacity of 3. Using A-grade brand new battery cells and a liquid cooling battery pack designed with a high level of car-grade battery temperature differential of less than 3 °C. The product is green and environmentally friendly, with low noise, zero pollution and zero emissions. The system which can meet different power needs in different scenarios such as fixed.
