What is a flow battery?

A flow battery is an electrochemical cell that converts chemical energy into electrical energy as a result of ion exchange across. Today Endurium™ and Endurium Enterprise™ deliver the most proven, safe & cost-effective alternative to lithium-ion. Demand from AI data centers alone is projected to increase 165% by 2030 and electricity grids around the world will need to deploy 8 TW of long-duration energy storage (LDES) by 2040 to meet clean energy targets. In the quest for sustainable energy solutions, flow batteries have emerged as a crucial technology, gaining increased attention from both researchers and flow battery companies.
