

Luxi new energy hydrogen solar container

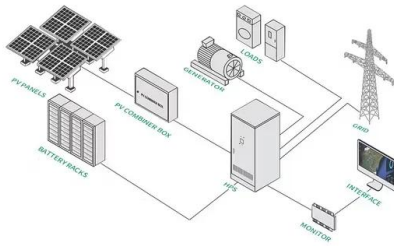

Overview

A research team led by Chalmers University of Technology, Sweden, have presented a new way to produce hydrogen gas without the scarce and expensive metal platinum, using sunlight, water and tiny particles of electrically conductive plastic. shipped the first hydrogen container bound for the United Arab Emirates (UAE) on Jan. We are now investing 2 billion to build a new LNG & CNG equipment industrial park, which will be a new boost to this industry. Our company adopts the most advanced production line equipment, which includes large stamping machines, automatic numerical control veneer reeling machine, numerical. LUXI Group will consolidate and develop rapidly chemical and fertilizer industry, deepen the management of safety and environment protecting and energy conservation, comprehensively improve the level of operation and Luxi New Energy Equipment Group Co.
