

# **National development center for new solar container**

## Overview

---

PNCT is one of the world's only container terminals to implement in-terminal renewable energy production of this magnitude, a significant component of the terminal's broader strategic initiative to develop an energy microgrid operating at net-zero emissions. In 1954, it was transformed to the State Planning Commission of the People's Republic of China. One of the key patterns that will drive the development prospects for the Solar Container amid the anticipated period is the Huge untapped potential for solar containers to provide This report focuses on the Solar Container sales, revenue, market share and industry ranking of main manufacturers.
