

# Ndrc encourages 4h solar container

## Overview

---

This container solution addresses three critical challenges that California faces right now: reducing wildfire risk, enhancing electric reliability, and expanding the capacity for electric vehicle charging in rural areas. Grid-tied solar systems are connected to the local power grid, allowing users to sell excess energy back to the grid. According to Wechat Official Account @escn518, in the short four months of 2025, a series of new policies have been successively released at the national and local levels, ushering in an unprecedented "policy storm" for China's new energy industry and accelerating the transformation of the energy. Let's face it: storing energy isn't exactly the most glamorous topic—until your lights flicker during a storm. But here's the kicker: China's National Development and Reform Commission (NDRC) is pushing power companies to prioritize energy storage, and this policy shift could reshape the entire.
