

New solar container path

Overview

Shipping container solar systems are transforming the way remote projects are powered. Make the next step towards renewable energy with our Solarcontainer! The challenges of our time are more present than ever. The Port Newark Container Terminal in New Jersey is now one of the few shipping hubs in the world to use on-site solar power to cut its own emissions (cropped; courtesy of Standard Solar). Whether you're managing a construction site, a mining operation, or an emergency. Maximum solar yield power generated annually with 400 kWh per day as average energy output. Below is a narrative description of how a solar-powered shipping container is revolutionising the face of access to global energy, off-grid energy, grid backup, and clean development for applications ranging from European building sites to African communities and the rest of the globe.
