

New solar container policy solicits opinions

Overview

This article outlines the core federal policy risks, their implications and the most viable mitigation levers for stakeholders. As the United States grapples with shifting political winds, developers in the distributed solar and storage market are facing a potential policy storm. The confluence of an uncertain future for the Inflation Reduction Act (IRA), escalating import tariffs and evolving state-level responses threaten. The solar industry encompasses so many manufacturing processes that the concept of 'public support for solar PV manufacturing' is an oversimplification.

New solar container policy solicits opinions

Unraveling the Solar Container: Future of Renewable Energy
