

# Off-grid lithium battery solar container

BMS Wiring Diagram

## Overview

---

Among the most scalable and innovative solutions are containerized solar battery storage units, which integrate power generation, storage, and management into a single, ready-to-deploy package. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. We combine high energy density batteries, power conversion and control systems in an upgraded shipping container package. Lithium batteries are CATL brand, whose LFP chemistry packs 1 MWh of energy into a battery volume of 2. [Metal Shell & Metal Fixture] Our flame-retardant metal casing resists fire and impact, allowing safe, direct installation in RVs and solar systems without an external box. Off-grid solar storage systems are leading this shift, delivering reliable and clean power to locations worldwide.
