

Oslo solar container subsidy policy

Overview

The government will subsidize up to 60% of the cost of installing a residential energy storage system, with a maximum subsidy of 50,000 kroner or \$5,600. The announcement follows the country's plans to stop burning fossil fuels to make electricity by the year 2040. Described as Zambia's inaugural solar facility equipped with battery storage, the project holds an estimated value of \$65 million. With 40% upfront cost coverage under the *EnergiX Fund* and tax rebates, businesses now save up to 55% on mobile solar container installations compared to 2023. Support from the European Battery Alliance and EUR1 billion in loans from the European Investment Bank in 2020 alone would help shore up investor confidence biggest single emitter of CO2 in Oslo. Subsidy payouts will be capped at ¥ 1 million (US\$9,846) for individuals and at ¥ 100 million (US\$982,000) for.
