

Oslo user-side solar container project

Overview

Imagine a world where clean energy is stored efficiently, transported effortlessly, and scaled for cities or remote sites alike. That's the promise of the Oslo Energy Storage Container House—a groundbreaking solution merging modular design with cutting-edge battery technology. Take the Vulcan Project in Oslo West—this hybrid system combines solar thermal storage with phase-change materials, providing 150MW of baseload power during Norway's darkest months. A city where solar panels work overtime, even when the sun's playing hide-and-seek. Let's unpack what makes this project tick—and why energy nerds (like us) can't stop talking. Port of Oslo's vision is to become the world's most environmentally friendly urban port. The plan for a zero-emissions port was established and approved by Oslo City Council in 2018.
