

Panerai power reserve time

Overview

Most automatic watches feature a power reserve of 36 to 42 hours, though high-end models, like certain Romlicen designs or the Panerai Luminor GMT 10 Days, can store energy for up to 50 or even 240 hours (10 days). Panerai brings to light a new mechanical value, enhancing the Manufacture heritage & know-how: a new timepiece with 10 Days of power reserve, enriching the Luminor Complicazioni line. The long power reserve was introduced to meet the strict requirements of the commandos of the Italian Navy who had. For example, if you fully wind your watch and place it on your dresser, how long before it stops running and needs to be wound again - that is the power reserve. 2003 is the first in-house automatic movement developed by the Italian brand at its watchmaking facilities in Neuchâtel, Switzerland.
