Overview

A phase change energy storage bag is a specialized thermal management system designed to utilize phase change materials (PCMs) for energy conservation and temperature regulation. Insolcorp phase change materials are built around a fundamental property of Nature: The natural tendency of materials to absorb heat when they melt (phase change from solid to liquid/gel) and to release heat when they solidify (phase change from liquid/gel to solid). | Machinio Ready to roll with fresh tires (thank you Santa) and no overnight wear. This device is a spherical encapsulated paraffin phase change heat exchanger device (stainless).
