

Photovoltaic solar container device maintenance plan

Overview

The article outlines maintenance procedures for photovoltaic systems, including inverters, charge controllers, PV arrays, and battery banks. This capacity-building manual was developed as part of the SESA project - Smart Energy Solution for Africa, funded by Research & Innovation. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at National Renewable Energy Laboratory, Sandia National Laboratory, SunSpec Alliance, and the SunShot National Laboratory Multiyear Partnership (SuNLaMP) PV O&M Best Practices. An O&M plan ensures the system meets production expectations and therefore provides maximum benefits to the residents and your utility bills.
