

# **Plzt solar container film**

## Plzt solar container film

---

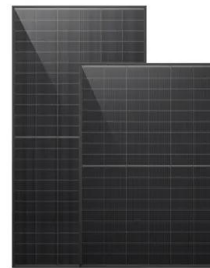

### Photonic integration based on a ferroelectric thin-film platform

A ferroelectric lanthanum-modified lead zirconate titanate (PLZT) thin film was epitaxially-grown by using a modified sol-gel method, and it exhibits large electro-optic coefficients ( $>120$ )

### Lead Lanthanum Zirconium Titanate

PLZT is a piezoelectric ceramic material with applications in dielectric thin films, CMOs, ceramic capacitors and resonators, ultrasound transducers, photovoltaic cells, and energy storage.

### Deposition and Characterization of Perovskite $Pb_{1-x}La_x(Zr,Ti)O_3$ ...

Lead lanthanum zirconate titanate (PLZT) is a leading candi-date material for surface optical waveguide devices due to its excellent electro-optic properties including its transparency in the visible and near ...

### Formation and its characteristics of PLZT layered film structure for

This paper reports on the formation of a new layered film structure and the highly improved photovoltaic output of the lead lanthanum zirconate titanate (PLZT) employed.

### Plzt thin film capacitors apparatus with enhanced photocurrent and

The disclosure generally relates a material system, and structure thereof, for a sensor or photovoltaic device, in particular, a ferroelectric thin film such as a lanthanum-doped lead zirconate

### PLZT Film Capacitors for Power Electronics and Energy Storage

By means of chemical solution deposition, we deposited 2-um-thick films of lanthanum-doped lead zirconate titanate (PLZT) on LaNiO3-buffered Ni (LNO /Ni) foils and platinized silicon (PtSi) substrates.

### Characterization of PLZT Thick Film Prepared by MOCVD

However, the report of MOCVD-PLZT thick films has been limited. This is because of the difficulty of the control of the film composition, which strongly affect the film property. In the present study, we used a ...

## Large Quadratic Electro-Optic Effect of the PLZT Thin Films for Optical

High-quality PLZT thin films have been fabricated by improved sol-gel, including multiple spin coating and plasma annealing. The XRD patterns show the PLZT thin films with preferred (110) ...

## Flexible PLZT antiferroelectric film capacitor for energy storage in

In this paper, the flexible PLZT 2/95/5 capacitor with a total thickness of about 30  $\mu\text{m}$  was obtained by CST and dry etching. The hysteresis loops and dielectric energy storage behavior of ...
