

# Portable solar container battery price trend

## Overview

---

A new analysis from energy think tank Ember shows that utility-scale battery storage costs have fallen to \$65 per megawatt-hour (MWh) as of October 2025 in markets outside China and the US. At that level, pairing solar with batteries to deliver power when it's needed is now. Are you planning to buy a mobile solar container but worried about price fluctuations?

With global demand for portable renewable solutions surging 78% since 2022, understanding price forecast trends could save you thousands. In 2025, average turnkey container prices range around USD 200 to USD 400 per kWh depending on capacity, components, and location of deployment.
