

President of china solar container

Overview

BEIJING – China’s world-leading clean energy boom has passed another benchmark, with its wind and solar capacity surpassing a target set by President Xi Jinping almost six years earlier than planned. President Donald Trump urged global leaders to abandon the effort to halt the Earth’s rising temperatures. Xi noted that this year marks both the 10th anniversary of the Paris Agreement and a crucial moment for submitting a new round of Nationally Determined Contributions. **XI’S NOT FOR TURNING:** Chinese president Xi Jinping confirmed that the country’s 2035 “nationally determined contribution” (NDC) will cover the “entire scope of the economy, including all greenhouse gases” and be published before COP30, Bloomberg reported.
