

# Shenzhen energy plans to participate in the solar container industry project planning

## Overview

---

Discover the groundbreaking integrated solar storage and charging project in Shenzhen's industrial parks, a model for zero-carbon transformation in China's manufacturing hub. SZ), a company specializes in the generation and distribution of electric power via coal-fired, gas, wind, photovoltaic, hydropower, and waste power plants, disclosed that one of its wholly-owned subsidiary will invest in the first. Guided by Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, we will implement the new strategy of "Four F Revolutions and One Cooperation" for energy security development, and accelerate the construction of a new energy system to support the realization of carbon peaking. As energy costs soar and power restrictions loom, this innovative solution leverages a 15MW rooftop solar system, 6MWh. [Shenzhen Energy Shule 2GW PV ESS Integrated Project Phase II 500MW Module Procurement Winning Candidates Announced] On January 17, the winning candidates for the PV module procurement of the 500,000 kW project under Phase II of the Shenzhen Energy Shule 2 million kW PV ESS integrated project were. The event was organized by the Shenzhen Development and Reform Commission and the Shenzhen Rural.

## Shenzhen energy plans to participate in the solar container industry
