

Solar container and new energy requirements for circuit breakers

Overview

Calculate your shipping container home's electrical panel size, circuit breakers, inverter capacity, and solar panel requirements. Eaton offers the industry's most complete and reliable circuit protection for PV balance of system, from fuses, fuse holders and circuit breakers to safety switches and surge protection—allowing for comprehensive overcurrent and overvoltage protection anywhere in the PV system. A circuit breaker protects the system from overloads and short circuits, preventing fires and damage to panels, inverters, and wiring. Using a breaker that is too small can cause it to trip constantly; one that is too large won't.
