

Solar container battery for jerusalem delivery car

Overview

Convert shipping containers into mobile power stations equipped with generators or solar panels. These can be deployed to remote areas or disaster-stricken regions to provide temporary power solutions. To save a bit of money instead, you can source your own solar panels, solar charge converter, batteries, inverter, and wiring, then make it all play together. For me and my limited time, an offer from Pecron for a solution that would do all of that for me sounded perfect, so I went with Pecron's. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. Make the next step towards renewable energy with our Solarcontainer! The challenges of our time are more present than ever.
