

Solar container battery pcs system

Overview

What manages the flow of energy between the grid and storage batteries in an energy storage system?

The Power Conversion System (PCS) plays a key role in efficiently converting and regulating the flow of energy between the grid and storage batteries. The Containerized Battery Energy Storage Solution (BESS) is an advanced Lithium Iron storage unit built into a customised 20ft or 40ft container. There are many different chemistries of batteries used in energy storage systems. For this guide, we focus on lithium-based systems, which dominate over 90% of the market.
