

# Solar container before and after the meter

## Overview

---

Yes, you'll still have an electric bill before and after your solar panels are installed and producing clean energy. In today's rapidly evolving energy landscape, understanding the distinctions and applications of behind-the-meter (BTM) and in-front-of-the-meter (IFM) energy solutions is crucial. Behind-the-meter (BTM) refers to the energy systems located on the customer's side of the utility meter. These systems—solar panels, batteries, or efficient appliances—mainly power the building, reduce grid use, lower bills, and can sell excess energy for income or credits.
