# Solar container epc equipment manufacturing

## Overview

Below is a list of the top 10 Solar EPC companies worldwide, recognized for their innovation, scale, and quality of service. First Solar (USA) A leader in solar technology, First Solar is renowned for its thin-film solar modules and utility-scale PV power plants. Core Development Group provides end-to-end commercial solar energy services, including designing the system, giving procurement details about the system, and installing the full commercial solar system. After delivering the functional solar system, Core Development Group can continue to perform. An EPC (Engineering, Procurement & Construction) company is responsible for designing, sourcing, and building a complete solar power project—from initial site surveys to full system commissioning. Developers, asset owners, energy providers, and even other EPCs choose GOLDBECK SOLAR’s tailored solutions to realize greater value across every phase of their projects. In this blog, we’ll explain everything related to EPC and when you should choose it.
