Overview

The new IEC/TS 62994:2024 introduces three critical updates every factory should implement: 1. This Standard establishes planning considerations that apply to industrial load handling equipment as they pertain to hoisting and rigging operations such as cranes, hoists, gantries, jibs, monorails, shop cranes, jacks, industrial dollies or rollers, forklifts, slings, rigging hardware. All the provisions of subpart CC apply to hoisting and rigging with the exception of § 1926. When you're about to roll out containerized solar systems--for a Haitian humanitarian mission or a telecom project in Namibia--you'll soon have to answer a crucial question: what certifications should solar containers have to ensure safety, performance, and compliance with regulations?

Solar. A 20-ton battery container swaying like a drunken elephant 30 feet above your project site. That's exactly what happened at a 2024 solar farm in Arizona when crews ignored proper hoisting protocols.
