

Solar container soc definition

Overview

SOC (Shipper's Own Container) means that the ownership or usage rights of the container belong to the shipper rather than the carrier. When to use it & why is it getting popular among freight forwarders Managing international cargo movement has always involved a series of trade-offs. While carrier-owned containers (COCs) are the property of a carrier and are rented out to the carrier's consignees, SOCs are the property of the shipper, who then pays the carrier to ship. These two container systems are essential in global trade, but they serve different purposes and come with distinct advantages.
