

Solar container spot welding machine operation instructions

Overview

How to Use This Spot Welding Machine Plug in the machine to an appropriate socket OR switch ON via the wall isolator box Set your welding TIME (in 1/10th and whole seconds), which is usually marked ON the machine OR given to you via your INSTRUCTOR Set your welding . Name Give a name to the spot welding gun (to identify it in Fronius Xplorer) Location (company), (plant), (hall), (cell) Enter the name of the company and location of the spot welding gun. Please check the package firstly to make sure it is not damaged in transit before use. To ensure the best user experience, we recommend reading the user manual thoroughly and keeping it for future reference. The user must therefore be edu-cated against the hazards, summarized below, deriving from welding operations. Unlike traditional welding machines that rely on a continuous power source, these machines store energy in capacitors and release it instantaneously when needed. What to do before use If you have a PACEMAKER, wear a HEARING AID or are PREGNANT, DO NOT use this machine. A large, magnetic field is generated which may INTERFERE with the operation of pacemakers and hearing aids or child development ALWAYS do a VISUAL inspection of the machine BEFORE plugging in.
