

# **Solar container station feasibility study report**

## Overview

---

This report evaluates the feasibility of utility-scale solar and identifies potential barriers. Evaluating the site and economic feasibility of a solar project is an essential step in the development process and should be completed in the initial stages, prior to preparing a system design, entering into contracts, or purchasing equipment. The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years.
