

Solar container system integrated design specifications

Overview

These self-contained units offer plug-and-play solar solutions for remote locations, emergency power needs, and grid supplementation. Solar panels collect energy from the sun and store it in the battery bank, and the inverter converts it to AC power, a grid-independent solution represents. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up.

Solar container system integrated design specifications

1000kw 3.7MW 3.7mwh Ess Solar Energy Storage System Large ...

The system uses square aluminum shell lithium iron phosphate cell with long life and high safety performance. The battery system is integrated in a 20-GP containers which capacity is 1003.5KWH.
