

Solar container system monitoring solution

Overview

The application provides real-time monitoring of all system parameters, remote control capabilities, emergency management, weather data integration, and comprehensive analytics dashboard accessible from smartphones and tablets. When your assets are under exposure in sunlight, solar powered GPS tracker does it work for sustainable power while tracking its location. However, in a recent industry & business talk, one comment stood out: “Customers aren’t asking where the container is. LZY mobile solar systems integrate foldable, high-efficiency panels into standard shipping containers to generate electricity through rapid deployment generating 20-200 kWp solar. Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no shading from a remaining container structure. The Bluesun 40-foot BESS Container is a powerful energy storage solution featuring battery status monitoring, event logging, dynamic balancing, and advanced protection systems. It also includes automatic fire detection and alarm systems, ensuring safe and efficient energy management. i4SD, a social enterprise that designs and implements smart infrastructure with the aim of contributing to sustainable development, chose Whitewall Solutions to develop the monitoring system that would provide real-time and historical information on the solar container manufactured by Whitewall.
